

ETSI ENUM Plugtests

Tony Holmes

BT

A little about ETSI Plugtests....

- ‘Interop’, ‘Bake-off’, ‘Plugtests’ - they are all the same
- A set of interoperability tests where engineers test draft standards and implementations
- No sales , no marketing, no customers!
- ETSI have have run 40+ events - Bluetooth, IPv6, VoIP & multimedia, voice quality, OSA/parlay etc
- Run on ‘cost neutral’ basis

Improves the standardisation process

The ENUM Plugtests event

Initial Workshop to identify main benefits from an ENUM Plugtests event

When:

Tuesday 24th & Wednesday 25th February

Where:

ETSI Headquarters, Sophia Antipolis, France
(close to Nice)

Full Plugtests event will then be held later in the year

The ENUM Plugtests Workshop

- Open to all - you don't have to be an ETSI member
- Free! - no charge to attend
- 1st day focusing on national User ENUM trials and activities
- 2nd day looking at Infrastructure ENUM issues (ENUM used specifically in the VPN environment , for intra & internetwork routeing etc)
- Planning for the Plugtests event

What will be covered at the Workshopa little more detail

- Overview of National presentations UK, France, Sweden. Ireland, Poland, Austria, Germany, Finland, US, and others
- Reference models
- Verification & Authentication principles
- Registration cycle for Authentication of numbers
- Registry/Registrar/Authentication Agency Interface requirements

.....and a little more

- Accreditation
- NAPTR formats
- Applications
- Policy developments
- Privacy!
- Overview and presentations of current application and trials in the corporate and mobile space
 - reference models, interface requirements, security etc
- main differences and requirements from 'User ENUM'
