Summary: RIPE47 DB-WG

Meeting: Amsterdam, Jan. 28. & 29., 2004
Slot #1: 87 Participants | Slot#2: 47+ Participants
Scribe: Nigel Titley, FLAG Telecom (THANKS!)
Agenda:

A. Administrative Matters

- scribe

- list of participants

- announcements (live on net, irc/jabber)

- draft agenda -> agenda

- minutes & actions

B. DB Operational Update

(Shane K., RIPE NCC) [~20 min]

Agenda: RIPE47 DB-WG

C. ERX (early registration transfer)

                    (Leo V., RIPE NCC) [~15 min]

D. X.509 support implementation

                    (Shane K., RIPE NCC) [~20 min]

E. CRISP/Joint-Whois status

                    (Shane K., RIPE NCC) [~15 min]

F. Getting rid of auth: NONE

                    (RIPE NCC) [~15 min]

Agenda: RIPE47   DB-WG

```
G. irt: / abuse:
   - populating inet[6]nums w/ irt links
         (Ulrich K., Vienna Univ.) [~15 min]
   - documentation available! (How-To, FAQ)
                           (WW144) [~5 min]
   - abuse-c: discussion & proposal summary
           (MarcoH, Demon Internet) [~15 min]
   - whois server:(def.) behaviour & format
                           (WW144) [~10 min]
   - how to get other WGs involved?
     Anti-Spam? (started!) Routing?
                           (WW144) [~5 min]
```

Agenda: RIPE47 DB-WG

H. RPSLng status and deployment

(Simon L., SWITCH) [~20 min]

I. S/MIME support

(Denis W., RIPE NCC) [~10 min]

J. Usefulness of DB-SW package

(Randy B., IIJ) [~10 min]

K. Do we need a BCP on
   "Proper Use of the Registry Database"?

(WW144) [~5 min]

Y. Input from other WGs

Z. AOB

Some Highlights

- CRISP/Joint-Whois:
  - Some worries about speed of achieving consensus
  - Availability of clients?
  - Please read the IETF drafts and get involved!
  - Potential to define unified view of the registry data-sets!
- Remove `auth: NONE`
  - Consensus
  - Will be implented very soon
  - Without warning (for security reasons)

Some Highlights (cont...)

- **`irt:`** vs. **`abuse:`** or **`abuse-c:`**
  - Healthy discussion
  - A poposal (by Randy & Niall) is available from the DB-WG mailing list, and is actively being discussed "over there"
  - Whatever we decide - it's going to be a "marketing" and documentation problem
  - please read the proposal and discussions and think about the impact on your operations!
    - LIR and HelpDesk and/or Incident Teams

Some Highlights (cont...)

- RPSLng is still in (final) discussion
- Input from other WGs
  - Anti-Spam: we started to liaise with Anti-Spam regarding abuse contact management and use
- DB-SW package (public domain)
  - Started to discuss the status of the DB-SW package,
    - ref. availability, maint. effort, "general usefulness":
  - please tell us on the DB-WG list if/when you (intend) to use the DB-SW package, internally or for a public service!

For the next meeting(s)...

- CRIPS/Joint-Whois:
  - Status/Maturity of IETF drafts
  - Impact/usefulness for IP and/or Routing Registries
  - Pilot implementations of server- and client-side software
- **`org:`** object implementation
- X.509 and S/MIME support implementation
- RPSLng deployment review?
